

THINK SAFETY FIRST

ALL ARM members have the opportunity to create a comprehensive safety program for their workplace. This will provide you with the tools that protect the health and safety of your employees and helps your facility comply with many of the MIOSHA regulations affecting auto recyclers. The program covers:

- 15 Key safety standards that are essential for the auto recycling industry.
- A Safety Compliance Manual to help you meet the MIOSHA record keeping and reporting requirements.
- How to access high quality online safety training for all employees through ARA university.

The ARM Safety Program is FREE to all ARM members, courtesy of the MICAR program, ARA University and the generous sponsorship of Michigan's leading scrap processors.

Keep your staff safe by implementing a safety program!
