

ARM Members Only Do-It-Yourself Storm Water Permit Compliance

All ARM members now have access to a set of Sample Compliance Documents that will help you prepare the required permit compliance documents that must be submitted to the Department of Environment, Great Lakes, and Energy (EGLE) - formerly the Department of Environmental Quality (DEQ).

Most of the samples are Microsoft Word documents that you can easily edit to describe the conditions at your facility.

The documents are available in the *Members Only Programs* under Storm Water on the ARM website, www.automotiverecyclers.org.

In order to access the Members Only Do-It-Yourself Storm Water Permit Compliance on the ARM website:

- Request a Log-In
- Once approved by the ARM office, you will have access to all Members Only content

If you have questions or need additional information, feel free to contact Dave Kendziorski, ARM Storm Water Program, at 414-943-1773 or dave@stormtech1.com. You may also contact your local DEQ industrial storm water representative (see *DEQ Storm Water Contacts*).
